

# COMPANY PROFILE

Alkarma industry and mining co. is a leading Egyptian company specializing in the extraction and production of high-purity calcium carbonate. Located in the heart of Egypt's rich mineral resources, we provide premium quality calcium carbonate products tailored for various industries, ensuring the highest standards of purity and performance to meet global market demands.

# ABOUT COMPANY

Al Karma Industry and Mining Co. established in 2023, is a pioneering company in Egypt's mining sector, located in Al-Minya, an area renowned for its premium limestone. The company owns a 90,000 square meter quarry and crusher, equipped with cutting-edge German technology. This facility is capable of producing approximately 90,000 tons of high-quality limestone per month, with a processing rate of 187 tons per hour. The crusher can produce particle sizes ranging from large 40 cm blocks to fine 50 $\mu$  particles, catering to various industrial needs.

Al Karma is committed to delivering top-tier limestone products, meeting both local and international standards.

## CHAIRMAN MESSAGE

Dear Valued Partners and Clients,

It is with great pride that I welcome you to Al-Karma Industry and Mining Co. Since our inception in 2023, we have been committed to delivering the highest quality limestone products from our state-of-the-art quarry and crusher in Al-Minya, a region renowned for its premium limestone reserves. Spanning 90,000 square meters and powered by advanced German technology, our facility produces approximately 90,000 tons of superior limestone monthly, with particle sizes ranging from 40 cm to 50μ, catering to a diverse range of industrial applications.

Our mission extends beyond just serving the local market; we aim to reach international markets by adding value to our raw materials, helping to strengthen the Egyptian economy. By bringing in foreign currency and encouraging foreign investment, we are dedicated to contributing to Egypt's economic growth alongside other investors and manufacturing partners.

At Al-Karma, we assure the quality of our materials through the most modern scientific methods, ensuring that our products meet and exceed industry standards. We are excited about the opportunities ahead and look forward to building lasting relationships with our partners, both locally and globally.

Thank you for choosing Al-Karma Industry and Mining Co. as your trusted partner.

Sincerely,

Ayman Alhawary  
Chairman

## VICE CHAIRMAN MESSAGE

Dear Valued Partners and Clients,

As the Vice Chairman of Al-Karma Industry and Mining Co., I am thrilled to welcome you on behalf of our team. Established in 2023, our company has quickly positioned itself as a leader in the mining and export of premium quality calcium carbonate, sourced from our quarry and advanced crusher in Al-Minya, Upper Egypt. This region is renowned globally for its exceptionally pure limestone, and we are proud to harness this natural resource to serve both local and international markets.

Our mission extends beyond merely supplying raw materials; we aim to drive growth by adding value to our products and expanding our export reach. In the next few years, we are targeting significant financial growth, with a focus on entering new markets and forging strong partnerships worldwide. By leveraging cutting-edge technology and maintaining strict quality controls, we are committed to delivering unmatched material quality that meets the highest industry standards.

We look forward to collaborating with global manufacturing giants and contributing to the Egyptian economy by attracting foreign investment and generating substantial foreign currency revenue. Together, we can achieve remarkable growth and success.

Sincerely,

Mr. Mohamed Khlaf  
Vice chairman

## MANAGING DIRECTOR MESSAGE

Dear Valued Partners and Clients,

It is with great enthusiasm that I welcome you to Al-Karma Industry and Mining Co. Since our establishment in 2023, we have rapidly positioned ourselves as a key player in the extraction and production of high-quality calcium carbonate, leveraging our state-of-the-art facilities and premium resources in Al-Minya, Egypt.

Financially, our vision for the next few years is both ambitious and strategic. We are focused on driving sustainable growth by expanding our market presence, both locally and internationally. Our financial targets include increasing our production capacity, enhancing operational efficiency, and exploring new markets to ensure a robust revenue stream. We aim to reinvest in our facilities, adopting the latest technologies to improve product quality and reduce costs, ultimately boosting our profitability.

In parallel, we are committed to fostering strong relationships with our clients and partners, as these collaborations are integral to achieving our financial goals. By continuing to deliver value-added products and maintaining our commitment to quality and innovation, we aspire to generate significant returns that will not only benefit our shareholders but also contribute to the broader economic development of Egypt.

Thank you for your trust and support as we embark on this exciting journey together.

Sincerely,

Doc. Ahmed Alhawary  
Managing Director of Financial Affairs

# OUR LOCATION

Al Minya Governorate in Upper Egypt is renowned globally for its exceptionally pure and high-quality calcium carbonate reserves. The region's unique geological formations have resulted in limestone deposits with minimal impurities, making it one of the best sources for industrial-grade calcium carbonate. The material extracted from Al Minya is highly sought after in various industries, including pharmaceuticals, plastics, and paper manufacturing, due to its consistent quality and superior whiteness. This purity makes Al Minya's calcium carbonate a preferred choice for companies requiring top-tier raw materials.

# OUR VISSION

We envision Al-Karma industry and mining co. as a globally recognized and trusted provider of calcium carbonate, known for our commitment to quality, sustainability, and innovation. Our goal is to expand our presence in international markets while maintaining strong ties to our local roots. By adding value to our raw materials and fostering partnerships with global industries, we aspire to drive economic growth, attract foreign investment, and establish Egypt as a key player in the global minerals market.

# OUR MISSION

Our mission at Alkarma industry and mining co. is to be a leader in the extraction and production of high-purity calcium carbonate, delivering premium raw materials that exceed industry standards. We are committed to sustainable practices, innovation, and continuous improvement, ensuring that our products enhance the quality and efficiency of various manufacturing processes both locally and globally. Through our dedication to excellence, we aim to contribute significantly to the growth of our clients, the industry, and the Egyptian economy.

# OUR VALUES

- **Quality:** We prioritize the highest standards in our products and processes, ensuring consistent excellence in everything we deliver.
- **Innovation:** We embrace modern technology and innovative methods to continuously improve our operations and products.
- **Sustainability:** We are committed to responsible mining practices that protect the environment and preserve resources for future generations.
- **Integrity:** We operate with transparency, honesty, and accountability in all our business dealings.
- **Customer Focus:** We are dedicated to understanding and meeting the unique needs of our customers, providing them with tailored solutions that drive their success.
- **Collaboration:** We believe in building strong partnerships with our clients, employees, and stakeholders to achieve mutual growth and success.
- **Economic Contribution:** We strive to contribute to the economic development of Egypt by attracting foreign investment and creating value-added products for global markets.

# QUALITY CONTROL

Quality control processes and procedures are crucial for ensuring the consistency, purity, and performance of calcium carbonate products. Here are some key quality control processes and procedures that a calcium carbonate production company should include in its company profile:

- Raw Material Inspection
- Production Process Monitoring
- Particle Size Analysis
- Chemical Analysis
- Whiteness and Brightness Testing
- Quality Control Sampling
- Quality Assurance Documentation
- Continuous Improvement Initiatives
- Training and Education
- By highlighting these quality control processes and procedures in the company profile, a calcium carbonate production company can demonstrate its commitment to delivering high-quality products that meet customer expectations and industry standards.

# OUR TEAM

## Eng. Ebrahim Gad

General manager

The general manager oversees the company's daily operations, aligning all departments with strategic goals. They ensure efficient resource management and drive performance to meet financial and operational targets.

## Mr. Wael Fareed

Commercial director

The Commercial Director drives business growth by managing sales, marketing, and business development, focusing on revenue generation and market expansion while maintaining strong client relationships.

## Mr. Mohamed Tony

Financial manager

The Financial Manager ensures the company's financial health through budgeting, financial planning, and risk management. They provide insights to support strategic decisions and maintain regulatory compliance.

## Mr. Mohamed Alaa

Purchase manager

The Purchase Manager handles procurement, negotiating with suppliers to secure cost-effective deals. They manage inventory levels and ensure the procurement process meets budget and quality standards.

## Mr. Khalid Mohamed

Human resources manager

The HR Manager manages recruitment, employee relations, and performance management. They develop HR policies, foster a positive work environment, and ensure alignment with the company's strategic objectives.
